

ABSTRACT

A hose having strong adhesion between a reinforcing fiber layer and a rubber layer without the use of an adhesive and which has an excellent sealing property. The hose has a laminated structure of a rubber layer 1, 3 and a reinforcing fiber layer 2, wherein the rubber layer is produced from the following components (A) to (E):

(A) a rubber comprising at least one of an ethylene-propylene-diene terpolymer and an ethylene-propylene copolymer;

(B) a peroxide crosslinking agent;

(C) a resorcinol compound;

(D) a melamine resin; and

(E) an epoxy resin.
